

Sweet Limes. **Refreshing, sweet and juicy.** **The perfect citrus fruit.**

Popular in the Persian, Hispanic and Indian communities, the Sweet Lime is light green in color with a yellow tint when completely mature, and ranges in size from 2 to 3 inches in diameter. Containing much less acid than ordinary limes, Sweet Limes have a sweet, mild flavor and are generally used for their juice.

Because they contain very little acid, they are much easier on the stomach, and are considered to have therapeutic value. Much esteemed in India, the Near East, Iran and Latin America, many value the Sweet Lime for its medicinal values in the prevention and treatment of cold, flu and fevers.

Seasonal Availability

The Sweet Lime traditionally blooms in the California desert during the late Winter and early Spring, with mature fruit available from October through February.
