August 11, 2010

Dear Seaview Dates,

I had to write to you today to tell you how much I enjoy and appreciate your fresh Medjool dates, which are of the highest quality I have come across. Indeed, I have even been to the date growing counties of the middle east, and none have been better than yours grown right here in the USA!

Your dates are very large, soft, remarkably sweet and not stringy. I have shared them with friends who have asked me if they were sweetened artificially in some way, but I told them no, that is how a natural date should taste if was fresh and properly prepared. Ad a natural food, dates are high in fiber which is a benefit for many organ systems, as well as having a lot of potassium calcium and magnesium; al this without any fat!

It is a great snack and that is why I have been ordering them by the 11 pound package, although I am sure that newcomers to this delightful food mayn want to experiment with smaller packages.

Sincerely,

Lewis H. Kaminester, M.D., F.A.A.D., F.A.C.P.
